

Bianca Carvalho de Oliveira

Vrije Universiteit Amsterdam
Amsterdam, The Netherlands
b.carvalhodeoliveira@vu.nl

About me	PhD student in Pure Mathematics at Vrije Universiteit Amsterdam. Participant of the project entitled "Symmetry on the interface of topology and higher algebra". My research interests include homotopy theory, infinity category, category theory and computer formalization.	
Education	PhD. in Pure Mathematics	2025- present
	Advisor: Inbar Klang, Thesis title: TBD, Funded by: . Vrije Universiteit Amsterdam (VU Amsterdam), The Netherlands.	
	Master's Degree in Pure Mathematics	2023 - 2025
	Advisor: Ivan Struchiner, Thesis title: "Rational Homotopy Theory", Funded by: CAPES, Brazil. University of São Paulo (USP), Brazil.	
	Bachelor in Pure Mathematics	2019 - 2023
	University of São Paulo (USP), Brazil.	
Complementary Education	Summer course: Metric spaces	2021
	A course on analysis on metric spaces, in which we were taught some of the most important basic theorems, such as the Intermediate Value Theorem, and its proofs.	
	Algebraic K-theory and the Farrell-Jones Conjecture, a topological approach - XXII EBT	2022
	This was a short course (four days) in which we learn the key ingredients to understand the Farrell-Jones conjecture. Federal University of Uberlândia (UFU), Brazil.	
	An invitation to braidgroups - XXII EBT	2022
Complementary Education	In this short course (four days) we learned the basic concepts and theorems of braid groups from the topological and algebraic perspective. Federal University of Uberlândia (UFU), Brazil.	
	Introduction to the geometric theory of groups	2023
	In this course we learned how to correlate geometric and algebraic information from groups and the action of this group in some spaces. University of São Paulo (USP), Brazil.	
	Geometry and compact group representations	2023
	The idea of this course was to construct enough of the theory of geometric representation of groups to be able to prove the correspondence between the irreducible representations of a Lie Group and the integral coadjoint orbits of the Lie algebra associated with the Lie group.	

University of São Paulo (USP), Brazil.

Talks	Poster Presentation 2022 Generalized Cohomology Theory and Spectra. Poster presentation in XXII EBT, Brazil.
	Symposium talk 2021 Introduction to the topological degree theory and applications to functional analysis and to bifurcation theory. Talk presented in both Portuguese and English, SIICUSP 2021, Brazil.
Conferences	XXII Brazilian Topology Meeting (EBT) 2022 Federal university of Uberlândia, Uberlândia, Brazil.
	International Symposium on Scientific and Technological Internship at USP (SIICUSP) 2021 University of São Paulo, São Paulo, Brazil.
Awards	Bronze medal: Brazilian Public School mathematics Olympiad 2016
	Bronze medal: Brazilian Public School mathematics Olympiad 2015
	Third place in the Scientific Exhibition of Robotics and Automation of Londrina 2014
Languages	Portuguese <i>Native</i>
	English <i>Fluent</i>
	Spanish <i>Intermediate</i>
Address	Uilenstede 510 - 225, Amstelveen, The Netherlands <i>Post Code: 1183 DE</i>
